

Rotation. Pub. date 7 April 2004. page 1 (1)

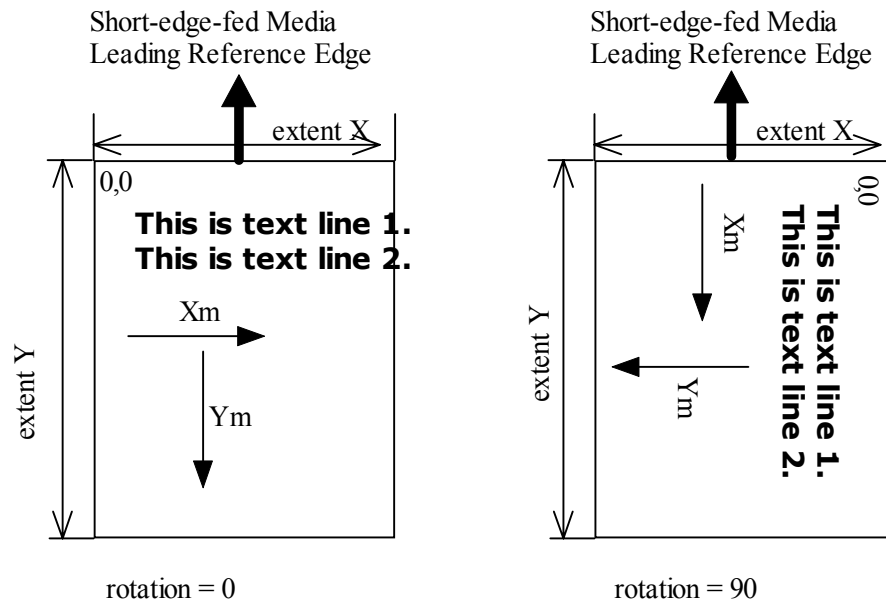

Rotation can be defined for each paper tray.

Path in the Advanced Print Server 200:

Configuration > Driver Menu > Paper In column: Click on Input Trays.

Here is an example of the effect of rotation. The background for the example is that the text line has proven to be too long to fit on the non-rotated paper and other solutions were not feasible.

0,0 = origin for physical IPDS coordinates
